WASH-OUT Solution

by HANCO

Produces a **STRONGER** *image by creating a greater affinity for ink.*

Hanco WASH-OUT Solution, when used in place of asphaltum, has a tendency to make the image have a greater affinity for ink, thereby producing a stronger, sharper impression.

May be used on both Albumen and Deep-Etch plates with splendid results.

By using Hanco WASH-OUT Solution, weak plates can be brought up to normal printing strength, then held by using Hanco Plasaver, which is a grease receptive lacquer.
